

Scratch Block Execution Test Report

Test Summary

Session ID: 20251003_131619

Total Tests: 10

Total Execution Time: 89.13s

Average Time per Test: 8.91s

Generated: 2025-10-03 13:18:19

Test 1: test_001

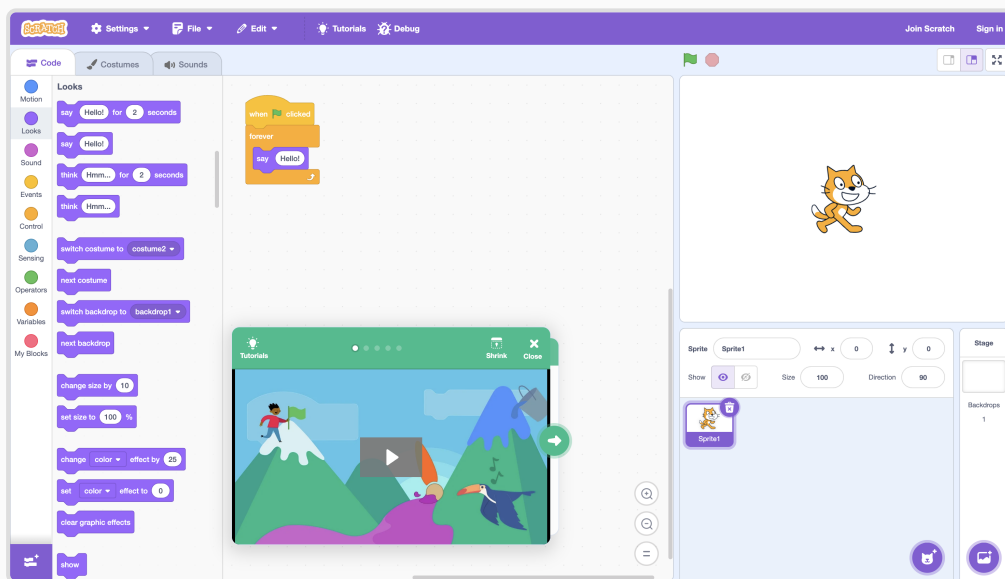

Description: Basic event and control flow

✓ **Execution completed.** ⌚ 7.55s 📦 3 steps

Input Steps:

1. **Events** → when green flag clicked
2. **Control** → forever
3. **Looks** → say message

Visual Result:

Workspace State:

Code space start from coordinates (X: 310, Y: 160). List of used blocks in the code space:

1. when Code block. Block Coordinates: (X: 350, Y: 143)
2. forever Code block. Block Coordinates: (X: 350, Y: 175)
3. say Code block. Block Coordinates: (X: 361, Y: 208)

Test 2: test_002

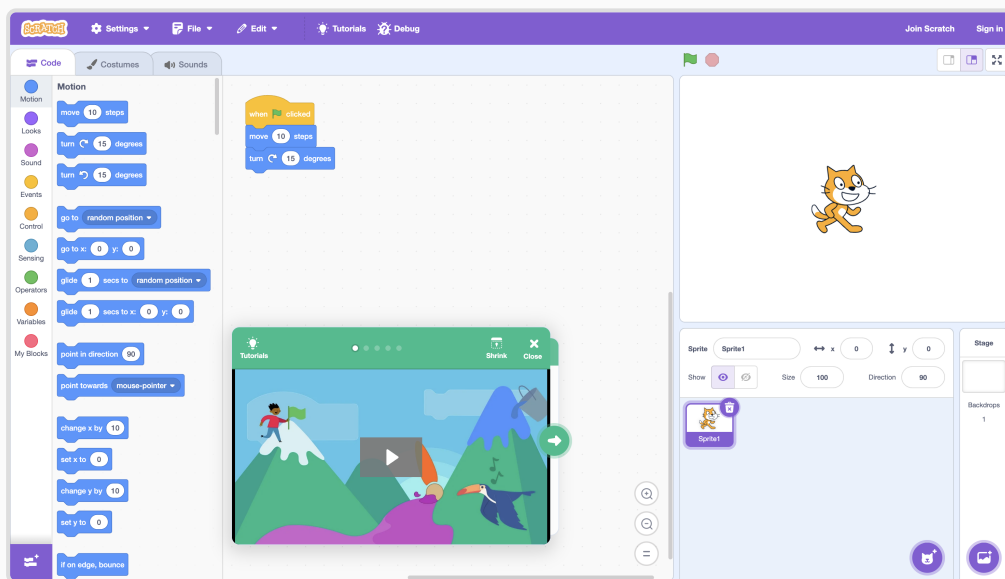

Description: Motion blocks sequence

✓ **Execution completed.** ⌚ 7.57s 📦 3 steps

Input Steps:

1. **Events** → when green flag clicked
2. **Motion** → move steps
3. **Motion** → turn right

Visual Result:

Workspace State:

Code space start from coordinates (X: 310, Y: 160). List of used blocks in the code space:

1. when Code block. Block Coordinates: (X: 350, Y: 143)
2. move Code block. Block Coordinates: (X: 350, Y: 175)
3. turn Code block. Block Coordinates: (X: 350, Y: 208)

Test 3: test_003

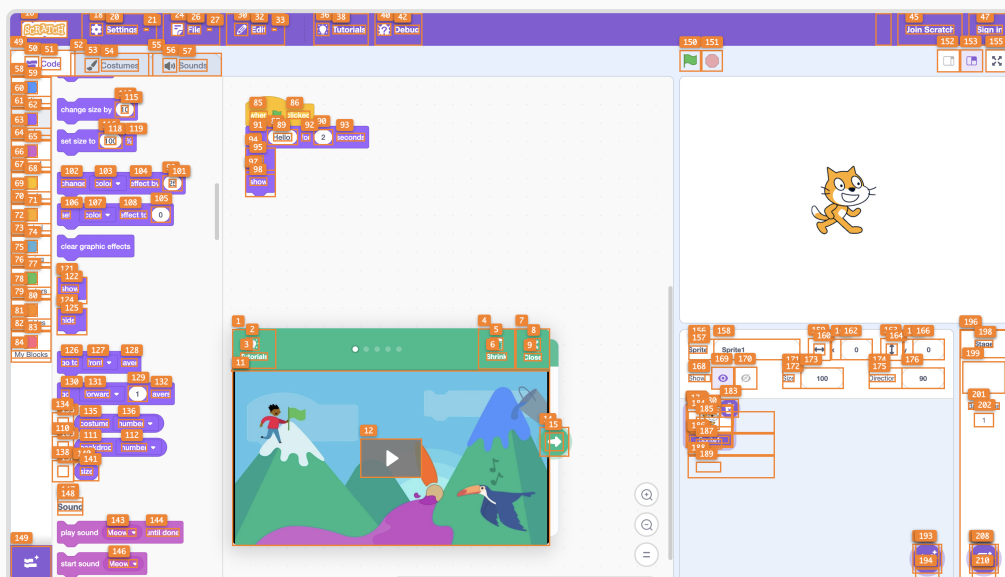

Description: Looks blocks with speech

✓ Execution completed. ⌚ 11.24s 🧱 4 steps

Input Steps:

1. **Events** → when green flag clicked
2. **Looks** → say message for seconds
3. **Looks** → hide
4. **Looks** → show

Visual Result:

Workspace State:

Code space start from coordinates (X: 310, Y: 160). List of used blocks in the code space:

1. when Code block. Block Coordinates: (X: 350, Y: 143)
2. move Code block. Block Coordinates: (X: 350, Y: 175)
3. turn Code block. Block Coordinates: (X: 350, Y: 208)

Test 4: test_004

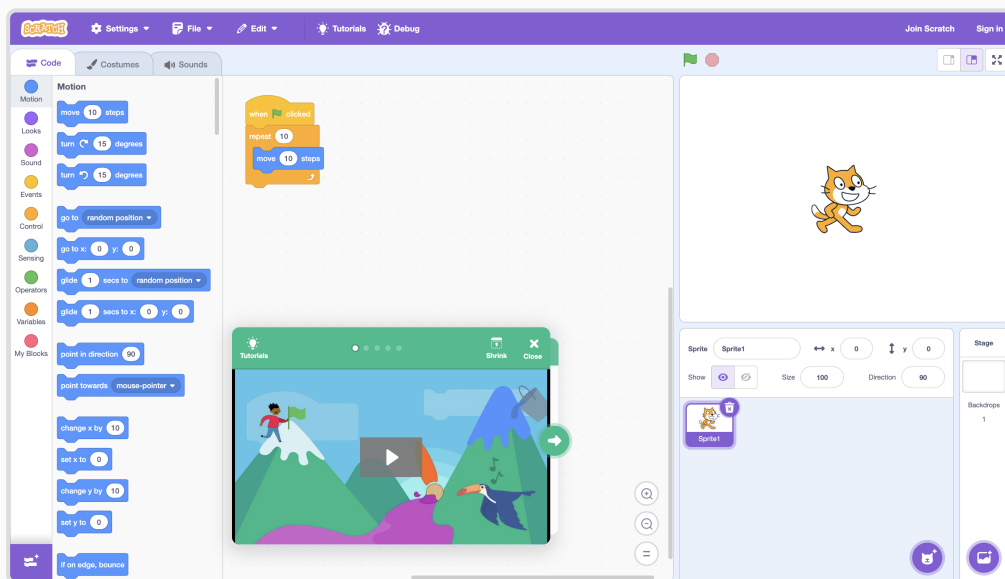

Description: Control structures with repeat

✓ **Execution completed.** ⌚ 7.53s 📦 3 steps

Input Steps:

1. **Events** → when green flag clicked
2. **Control** → repeat times
3. **Motion** → move steps

Visual Result:

Workspace State:

Code space start from coordinates (X: 310, Y: 160). List of used blocks in the code space:

1. when Code block. Block Coordinates: (X: 350, Y: 143)
2. repeat Code block. Block Coordinates: (X: 350, Y: 175)
3. move Code block. Block Coordinates: (X: 361, Y: 208)

Test 5: test_005

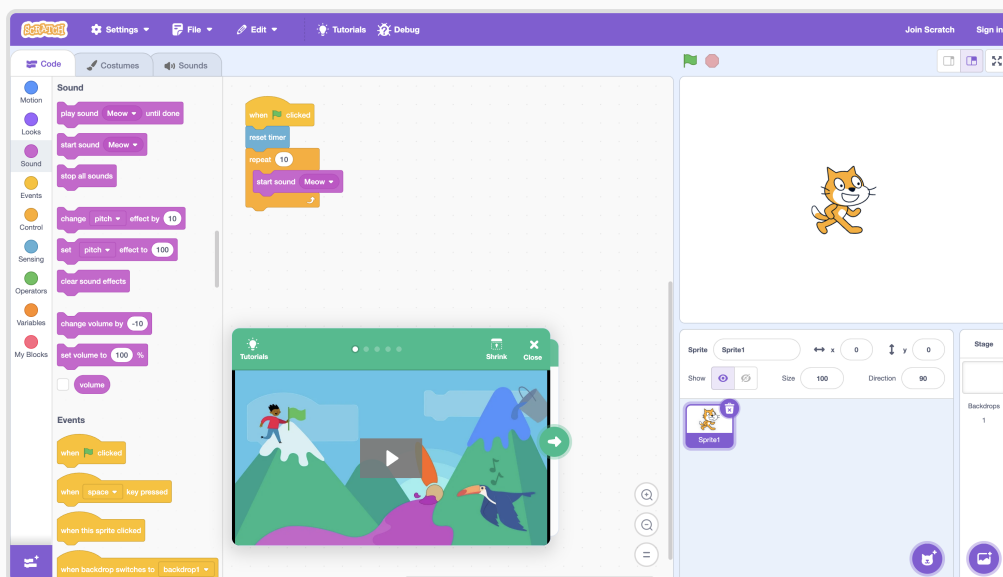

Description: Timer operations

✓ **Execution completed.** ⌚ 9.93s 📦 4 steps

Input Steps:

1. **Events** → when green flag clicked
2. **Sensing** → reset timer
3. **Control** → repeat
4. **Sound** → start sound

Visual Result:

Workspace State:

Code space start from coordinates (X: 310, Y: 160). List of used blocks in the code space:

1. when Code block. Block Coordinates: (X: 350, Y: 143)
2. repeat Code block. Block Coordinates: (X: 350, Y: 208)

Test 6: test_006

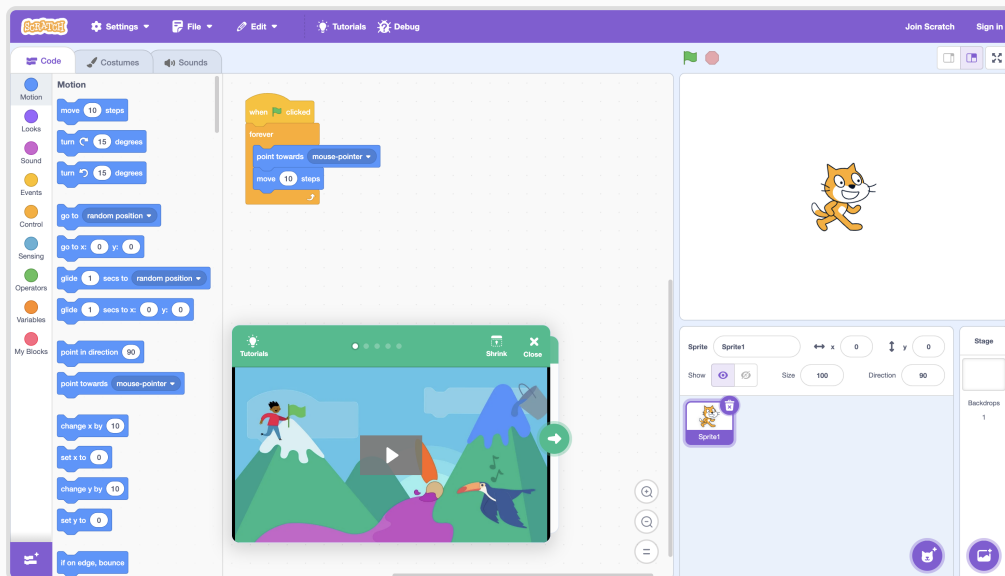

Description: Mouse following behavior

✓ **Execution completed.** ⌚ 8.84s 📦 4 steps

Input Steps:

1. **Events** → when green flag clicked
2. **Control** → forever
3. **Motion** → point towards
4. **Motion** → move steps

Visual Result:

Workspace State:

Code space start from coordinates (X: 310, Y: 160). List of used blocks in the code space:

1. when Code block. Block Coordinates: (X: 350, Y: 143)
2. forever Code block. Block Coordinates: (X: 350, Y: 175)
3. move Code block. Block Coordinates: (X: 361, Y: 240)

Test 7: test_007

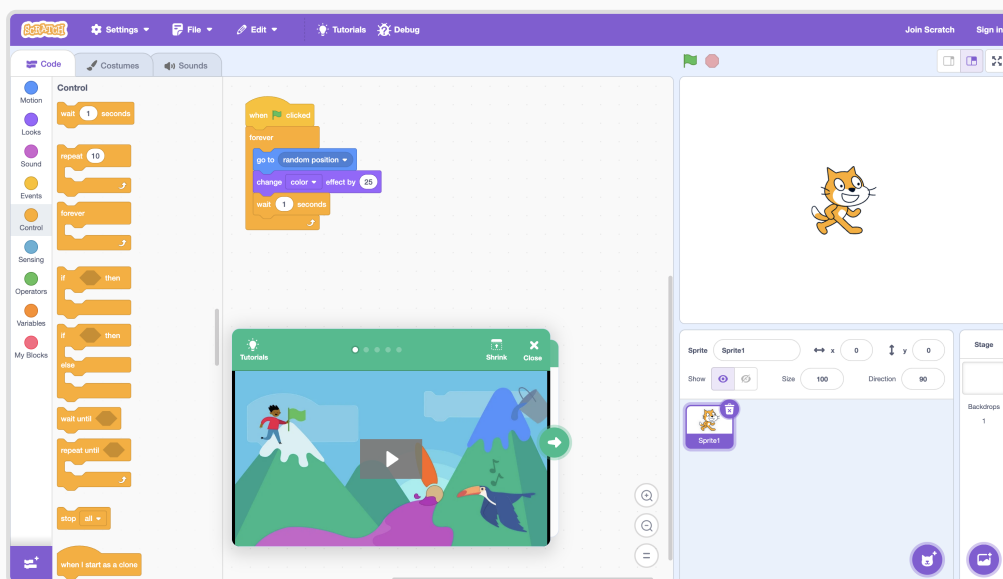

Description: Complex animation loop

✓ **Execution completed.** ⌚ 10.11s 📦 5 steps

Input Steps:

1. **Events** → when green flag clicked
2. **Control** → forever
3. **Motion** → go to random position
4. **Looks** → change graphic effect
5. **Control** → wait seconds

Visual Result:

Workspace State:

Code space start from coordinates (X: 310, Y: 160). List of used blocks in the code space:

1. when Code block. Block Coordinates: (X: 350, Y: 143)
2. forever Code block. Block Coordinates: (X: 350, Y: 175)
3. go to Code block. Block Coordinates: (X: 361, Y: 208)
4. change Code block. Block Coordinates: (X: 361, Y: 240)
5. wait Code block. Block Coordinates: (X: 361, Y: 272)

Test 8: test_008

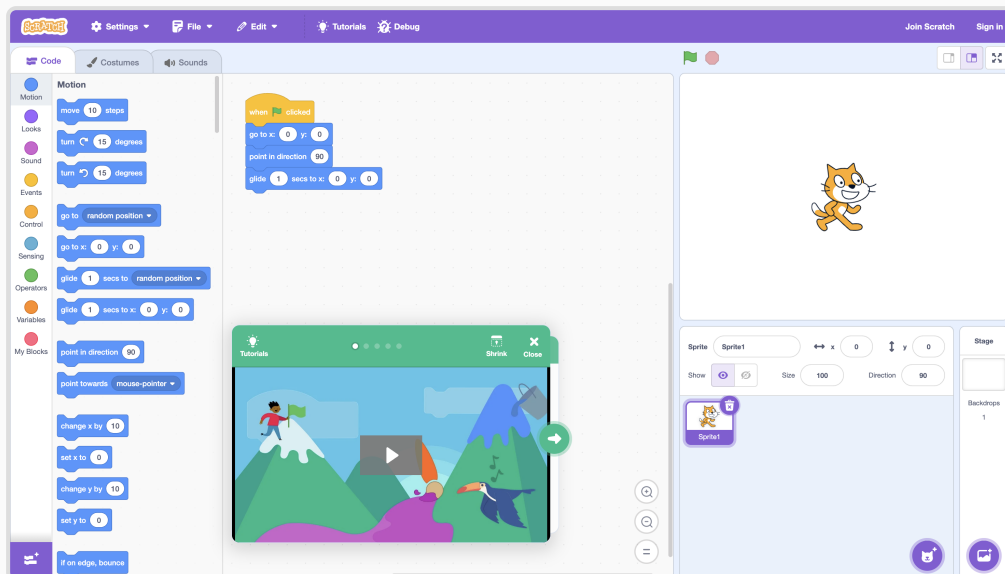

Description: Sprite positioning sequence

✓ **Execution completed.** ⌚ 8.82s 📦 4 steps

Input Steps:

1. **Events** → when green flag clicked
2. **Motion** → go to position
3. **Motion** → point in direction
4. **Motion** → glide

Visual Result:

Workspace State:

Code space start from coordinates (X: 310, Y: 160). List of used blocks in the code space:

1. when Code block. Block Coordinates: (X: 350, Y: 143)
2. go to x: Code block. Block Coordinates: (X: 350, Y: 175)
3. glide Code block. Block Coordinates: (X: 350, Y: 240)
4. secs to x: Code block. Block Coordinates: (X: 413, Y: 240)

Test 9: test_009

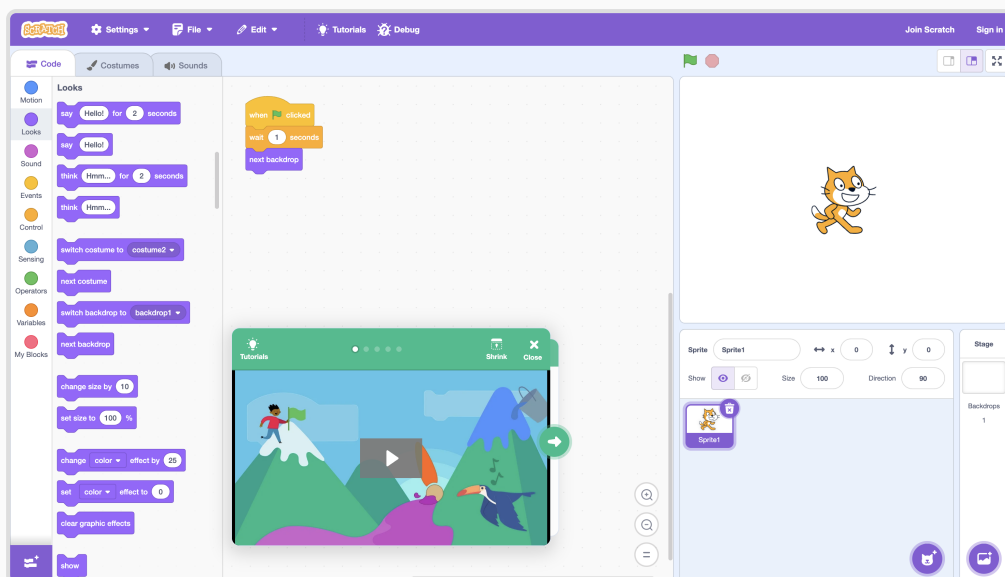

Description: Backdrop switching

✓ **Execution completed.** ⌚ 7.55s 📦 4 steps

Input Steps:

1. **Events** → when green flag clicked
2. **Looks** → switch backdrop
3. **Control** → wait seconds
4. **Looks** → next backdrop

Visual Result:

Workspace State:

Code space start from coordinates (X: 310, Y: 160). List of used blocks in the code space:

1. when Code block. Block Coordinates: (X: 350, Y: 143)
2. wait Code block. Block Coordinates: (X: 350, Y: 175)

Test 10: test_010

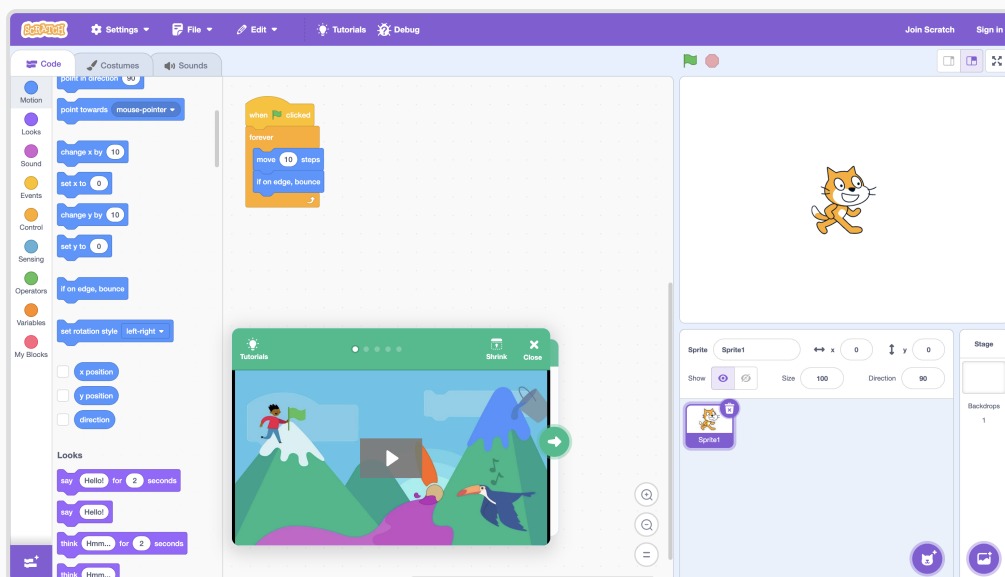

Description: Edge detection and bounce

✓ Execution completed. ⌚ 9.99s 📦 4 steps

Input Steps:

1. **Events** → when green flag clicked
2. **Control** → forever
3. **Motion** → move steps
4. **Motion** → if on edge bounce

Visual Result:

Workspace State:

Code space start from coordinates (X: 310, Y: 160). List of used blocks in the code space:

1. when Code block. Block Coordinates: (X: 350, Y: 143)
2. forever Code block. Block Coordinates: (X: 350, Y: 175)
3. move Code block. Block Coordinates: (X: 361, Y: 208)
